

Michelin North America uses Navicat to increase efficiency

"Having all of my database environments accessible from one tool has greatly streamlined my work."

Caleb Elrod

IT Software Engineer, Michelin North America, Inc.

About Michelin North America

Michelin North America is a subsidiary of Michelin, a global tire manufacturer dedicated to sustainably improving the mobility of goods and people by manufacturing and marketing tires for every type of vehicle.

Favorite Features

It had been a few years since I last used Navicat, and coming back to it quickly reminded me of all the features I had been missing. One of the biggest advantages is having all of my database servers centralized in a single interface, making it easy to connect, navigate, and reference them whenever needed.

Daily Workflow

The ability to easily import and export data has significantly improved my day-to-day workflow. In the past, when I needed to move historical data between databases, I often had to build or find custom processes to accomplish the task. Navicat simplifies these operations and saves a considerable amount of time and effort.

Efficiency & Impact

Having all of my database environments accessible from one tool has greatly streamlined my work. Navicat is smooth, responsive, and more efficient than many native database management interfaces. Whether I'm connecting to MySQL or SQL Server, I can typically access and work with data faster than I can through the native workbench tools. Overall, it has been a tremendous productivity boost and a valuable addition to my workflow.

Industry:
Manufacturing

Company Size:
Over 23,000 employees

Product:
Navicat Premium
Enterprise edition
