Navicat for Oracle

Navicat for Oracle improves the efficiency and productivity of Oracle developers and administrators with a streamlined working environment. Optimizing your Oracle development - create, organize, access, and share information quickly and securely. Navicat for Oracle is compatible with cloud databases like Amazon RDS and Oracle Cloud, and supports local/remote Oracle servers.

FEATURE OVERVIEW

Seamless Data Migration

Data Transfer, Data Synchronization and Structure Synchronization help you migrate your data easier and faster for less overhead. Deliver detailed, step-by-step guidelines for transferring data across databases. Compare and synchronize databases with Data and Structure Synchronization. Set up and deploy the comparisons in seconds, and get the detailed script to specify the changes you want to execute.

Diversified Manipulation Tool

Use Import Wizard to transfer data into a database from diverse formats, or from ODBC after setting up a data source connection. Export data from tables, views, or query results to formats like Excel, Access, CSV and more. Add, modify, and delete records with our spreadsheet-like Grid View together with an array of data editing tools to facilitate your edits. Navicat gives you the tools you need to manage your data efficiently and ensure a smooth process.

Easy SQL Editing

Visual SQL Builder will help you create, edit and run SQL statements without having to worry about syntax and proper usage of commands. Code fast with Code Completion and customizable Code Snippet by getting suggestions for keywords and stripping the repetition from coding. Quickly locate and correct PL/SQL coding errors using our debugging component such as setting breakpoints, stepping through the program, viewing and modifying variable values, and examining the call stack.

Intelligent Database Designer

Create, modify and manage all database objects using our professional object designers. Convert your databases into graphical representations using a sophisticated database design and modeling tool so you can model, create, and understand complex databases with ease.

Data Visualization Tool

Our Charts feature lets you create visual representations of large data sets and help you to gain deeper insights from your data. Explore and unearth patterns, trends and relations between data, and create effective visual outputs to present your findings in dashboard for sharing.

Data Generation Tool

Provide a comprehensive range of functions to generate a large volume of quality testing data. You can rapidly create realistic data sets with referential integrity based on business rules and constraints.

Increase Your Productivity

Our intuitive GUI for Oracle Data Pump Utility guides you through the backup process and reduces the potential for errors. Set an automation for repeatable deployment process like script execution at a specific time or day. No matter where you are, you can always get the job done.

Make Collaboration Easy

Synchronize your connection settings, queries, models, snippets, chart workspaces and virtual group information to the cloud service so you can get real-time access to them, and share them with your coworkers anytime and anywhere.

Advanced Secure Connection

Establish secure connections through SSH Tunneling ensures every connection is secure, stable, and reliable. Navicat provides more encryption formats and high-performance environments so you never have to worry about connecting over an insecure network.
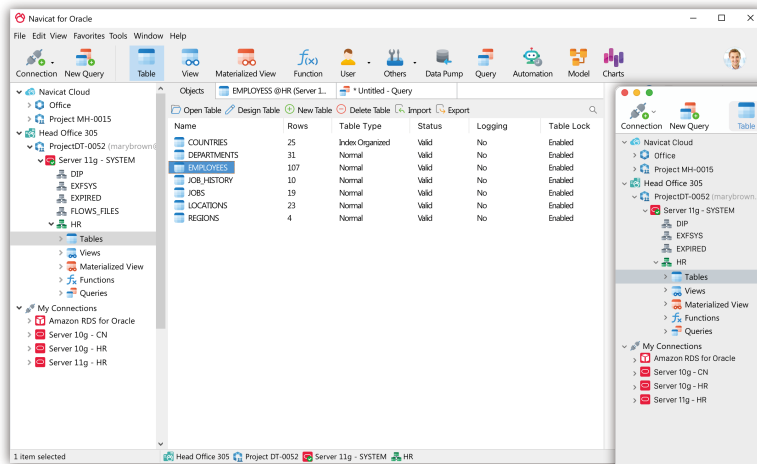

Cross-Platform Licensing

Cross-platform licensing is now available. Whether you're operating on Windows, macOS, or Linux, you can purchase once and select a platform to activate and later on transfer your license.
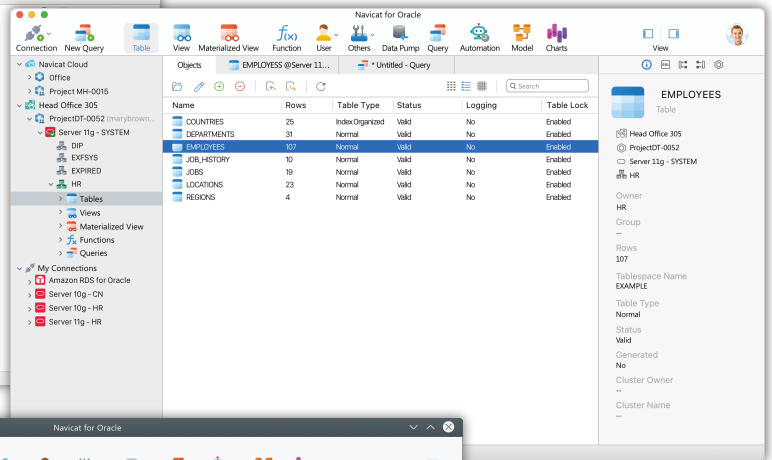

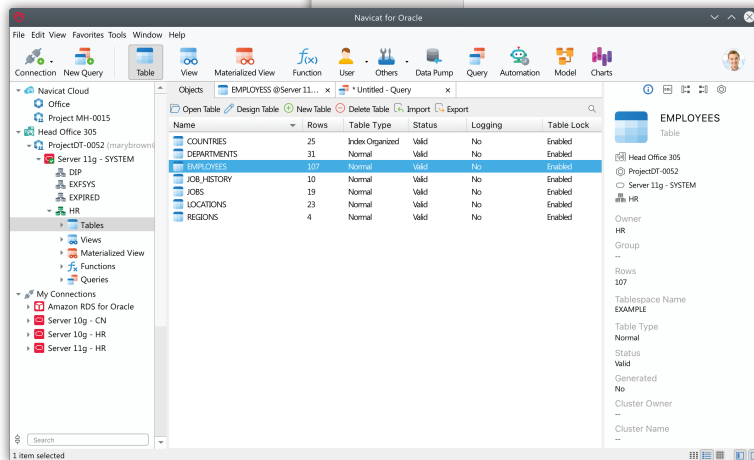

Dark Mode

Set dark theme to protect your eyes from the traditionally blinding whiteness of computer. No behavior changes with how pages look when you are in dark mode.
