

Feature Matrix

Connection	Standard	Enterprise
MariaDB 5.1 or later	✓	~
Amazon AWS, Microsoft Azure, Tencent Cloud	✓	~
Secure connection: SSH, HTTP Tunnel and SSL/TLS	✓	~
PAM authentication	✓	~
Centralized connection management	✓	~
Connection profiles	✓	~
Customize connection colorings	✓	~
Export/import connection settings	✓	~
Navicat Collaboration		
Collaboration: create projects, add members	✓	~
Synchronize connection settings, queries, snippets and virtual group information	✓	~
Synchronize BI workspaces and model workspaces		~
Data Viewer and Editor		
Grid view	/	~
Form view	~	/
Data profiling	~	~
Text, hex, image or web viewer and editor	✓	~
Foreign key data selection	✓	V
Filter and sort	✓	V
Table profile	✓	V
Find and replace	✓	~
Query Processing		
Query editor with syntax highlight	✓	~
Code completion	✓	~
Code snippet	✓	~
Query builder	✓	~
Visual explain	✓	~
Pin query result	✓	~
SQL beautifier and minifier	✓	~
Find and replace	✓	~
Create parameter queries	✓	~
Console	✓	~
Object Designer		
Database object design tools	✓	V
View builder	✓	V
SQL preview	✓	~
ВІ		
Over 20 chart type options		V
Visualize live data		V
Customized fields		V
Customize multiple pages dashboard		~
Add interactive controls		V
Present mode		V

Physical model Reverse database to model Synchronize model to database Synchronize model to database Synchronize model to SQL file Compare model workspaces Auto layout Advisory synchronize model to SQL file Compare model workspaces Auto layout Advisory synchronize model to SQL file Compare model workspaces Auto layout Advisory synchronize model workspaces Auto layout Advisory synchronize model promiter in the square synchronize model workspaces Import database diagrams to PDF and graphic files Import data from/ to plain text file formats: TXT, CSV, XML, JSON Import data from ODBC, MS Excel, MS Access, DBF Export data to MS Excel, DBF Export data for MS Excel, DB	Model	Standard	Enterprise
Synchronize database to model Synchronize model to database Export model to SOU.file Compare model workspaces Auto layout Add vertices, layers, images, notes, labels and shapes Print database diagrams to PDF and graphic files Import data from/ to plain text file formats: TXT. CSV, XML. JSON Import and Export Import data from OBGK, MS Excel, MS Access, DBF Export data to MS Excel, DBF Export	Physical model		~
Synchronize model to database Export model to SQL file Add vertices, layers, images, notes, labels and shapes Auto layout Add vertices, layers, images, notes, labels and shapes Print database diagrams to PDF and graphic files Import Agoort data from CDBC, MS Excel, MS Access, DBF Export data to MS Excel, DBR Excel, MS Access, DBF Export data to MS Excel, DBR Export data to MS Excel, MS Access, DBF Export data to MS Excel, MS Access, DBF Export data to MS Excel, MS Excel, MS Access, DBF Export data to MS Excel, DBR Export data to MS Excel, DBR Export data to MS Excel, MS Excel, MS Excel, MS Excel, MS Excel, DBR Export data to MS Excel, DBR Export	Reverse database to model		~
Export model to SQL file	Synchronize database to model		~
Compare model workspaces Auto layout Auto layout Add vertices, layers, images, notes, labels and shapes Print database diagrams to PDF and graphic files Import Again Export Import Again From Mode, Machage Special Compare	Synchronize model to database		~
Auto layout Add vertices, layers, images, notes, labels and shapes Phrith database diagrams to PDF and graphic files Import and Export Import data from/to plain text file formats: TXT, CSV, XML, JSON Import data from ODBC, MS Excel, MS Access, DBF Export data to MS Excel, MS Excel, MS Access, DBF Export data to MS Excel, DBF Export data to MS Access (Vindows Edition only) Structure and Data Manipulation Structure and Data Manipulation Structure synchronization Data generation Data generation Data dictionary Copy and paste data across databases Backup and Restore Backup/restore database Backup/restore database Convert backup file into SQL, script Dump/execute SQL, file Automation Set schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Ser schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Ser schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Ser schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Ser schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, and the support file in notification email Set schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, and the support file in notification email Set schedule on : query, backup, data transfer, data synchronization	Export model to SQL file		~
Add vertices, layers, images, notes, labels and shapes Print database diagrams to PDF and graphic files Import deat from CDBC, MS Excel, MS Access, DBF Export data to MS Excel, DBF Export data to MS Excel, DBF Export data to MS Excel, BDF Export data to MS Excel, BDF Export data to MS Excel, BDF Export data to MS Excel, Windows Edition only) Structure and Data Manipulation Structure synchronization Data transfer Data synchronization Data generation Data generation Copy and paste data across databases Backup/restore database Convert backup file into SQL script Dump/execute SQL file Automation Set schedule on: query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Server Security Manage user Server Model Pile Rudgram view Open object via URI Virtual grouping Database vide search Automation Servorites list Feavorites list Feavori	Compare model workspaces		~
Print database diagrams to PDF and graphic files Import And Export	Auto layout		~
Import and Export Import /export data from/to plain text file formats: TXT, CSV, XML, JSON Import data from OBEC, MS Excel, BS Access, DBF Export data to MS Excel, DBF Export data to MS Access (kindows Edition only) Structure and Data Manipulation Structure synchronization Data transfer Data synchronization Data generation Data generation Data generation Data generation Data generation Data data across databases Copy and paste data across databases Backup /restore database Convert backup file into SQL script Dump /execute SQL file Set schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Server Security Manage user ER diagram view Open object via URI Virtual grouping Databases wide search Fevorites list Focus model **Verification**	Add vertices, layers, images, notes, labels and shapes		~
Import / export data from/to plain text file formats: TXT, CSV, XML, JSON Import data from OBC, MS Excel, MS Access, DBF Export data to MS Excel, DBF Export data to MS Excel, DBF Export data to MS Excel, Uniformatic MS Export data to MS Excel, Uniformatic MS Export data to MS Access (Unifows Edition only) Structure and Data Manipulation Structure synchronization Data transfer Data synchronization Data generation Data dictionary Copy and paste data across databases Backup frestore databases Backup frestore database Convert backup file into SQL script Dump/execute SQL file Automation Set schedule on: query, backup, data transfer, data synchronization, data generation, data dictionary, Bl., model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Server Security Manage user Server monitor Other Useful Features ER diagram view Open object via URI Virtual grouping Latabase wide search Favorites list Focus model V	Print database diagrams to PDF and graphic files		~
Import data from ODBC, MS Excel, MS Access, DBF	Import and Export		
Export data to MS Excel, DBF Export data to MS Access (Windows Edition only) Structure and Data Manipulation Structure synchronization Structure synchronization Structure synchronization Data transfer Data synchronization Oata generation Data generation Data generation Data dictionary Copy and paste data across databases Backup and Restore Backup and Restore Backup flee into SQL script Dump/execute SQL file Automation Set schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job include attachment for export file in notification email Server Security Server Security ER diagram view Open object via URI Virtual grouping Statabase wide search Favorites list Focus mode Synchronization end Synchronization Synchr	Import/export data from/to plain text file formats: TXT, CSV, XML, JSON	~	~
Export data to MS Access (Windows Edition only) Structure and Data Manipulation Structure synchronization Structure synchronization Structure synchronization Data transfer Data synchronization W Data synchronization W Data dictionary Copy and paste data across databases Backup and Restore Backup and Restore Backup frestore database Convert backup file into SQL script W Dump/execute SQL file Automation Set schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job local data data transfer in in otification email Server Security Manage user Server monitor Other Useful Features ER diagram view Open object via URI V V V Favorites list Focus mode V V V Focus mode	Import data from ODBC, MS Excel, MS Access, DBF	~	~
Structure and Data Manipulation Structure synchronization	Export data to MS Excel, DBF	~	~
Structure synchronization Data transfer Data synchronization Data generation Data generation Data dictionary Copy and paste data across databases Backup and Restore Backup frestore database Convert backup file into SQL script Dump/execute SQL file Automation Set schedule on: query, backup, data transfer, data synchronization, data generation, data dictionary, Bl, model, import, export Run profiles from different servers in a single batch job include attachment for export file in notification email Server Security Manage user Server monitor Cherica Square SQL File Automation Set schedule on: query, backup, data transfer, data synchronization, data generation, data dictionary, Bl, model, import, export Run profiles from different servers in a single batch job include attachment for export file in notification email Server Security Manage user Server monitor Cherica Square Square William of the square Squ	Export data to MS Access (Windows Edition only)	~	~
Data transfer Data synchronization Data generation Data generation Data dictionary Copy and paste data across databases Backup and Restore Backup festore database Convert backup file into SQL script Dump/execute SQL file Automation Set schedule on: query, backup, data transfer, data synchronization, data generation, data dictionary, Bl, model, import, export Run profiles from different servers in a single batch job include attachment for export file in notification email Server Security Manage user Server monitor Ditter Useful Features ER diagram view Open object via URI Open object via URI Favorites list Focus mode Over the desired over the server of the properties of the properties over the server of the properties over the server over the server over over the server over the server over the server over over the server over the server over over over the server over over over the server over the server over over the server o	Structure and Data Manipulation		
Data synchronization Data generation Data generation Copy and paste data across databases Backup and Restore Backup restore database Convert backup file into SQL script Dump/execute SQL file Automation Set schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Server Security Manage user Server monitor Other Useful Features ER diagram view Open object via URI Open object via URI Favorites list Focus mode Focus mode Focus mode Occur	Structure synchronization		~
Data generation Data dictionary Copy and paste data across databases Backup And Restore Backup/restore database Convert backup file into SQL script Dump/execute SQL file Automation Set schedule on: query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Server Security Wanage user Server monitor Other Useful Features ER diagram view Open object via URI Virtual grouping Database wide search Favorites list Focus mode	Data transfer		
Data dictionary Copy and paste data across databases Backup And Restore Backup/restore database Convert backup file into SQL script Dump/execute SQL file Automation Set schedule on : query, backup, data transfer, data synchronization, data generation, data dictionary, BI, model, import, export Run profiles from different servers in a single batch job Include attachment for export file in notification email Auromation Server Security Manage user Server monitor Other Useful Features ER diagram view Open object via URI Virtual grouping Database wide search Favorites list Focus mode V V V V V V V V V V V V V	Data synchronization		V
Copy and paste data across databases Backup restore database Convert backup file into SQL script Conv	Data generation		V
